Ikaruga is a funny game in my eyes. On one hand you might say it's too difficult and in some cases so difficult that it's not fun to play. On another you could say that the heart pounding nature of it and brilliant soundtrack can keep your mind away from the difficulty and still have fun. So where do I stand, you ask? I'm somewhere in the middle, as a hater of overly difficult games, I can in fact prove that this game is stupidly difficult but as a fan of adrenaline filled, rockin soundtracked games. I can also say that this is one of the best soundtracks I've ever heard in a video game and it feels great to weave through bullets. I real like the game but can see it's glaring flaw. Not as good as Touhou but still bretty good. Great classic arcade shmup. Bought to support more of these. Radiant Slivergun next please.
